## CATIONIC 40% TACKCOAT (C40B4)

Cationic 40% is a bituminous tackcoat that is used to promote adhesion between successive layers of asphalt.

### ADVANTAGES OF CATIONIC 40%

- Good adhesion between layers of asphalt.
- Suitable for hand-lance application.
- Can be applied at low temperature.
- A stable emulsion.

For tack coating applications the spray rate of Cationic 40% should be 0.5 l/m<sup>2</sup>

Cationic 40% is also used to seal cement bound layers as specified in the NRA 800 series.

Cationic 40% complies with The NRA Binder Specifications: RC 380/13 Table 1.
