

BRINGING QUALITY TO THE SURFACE

IRISH TAR

CATIONIC 70%

Cationic 70% is a bitumen emulsion which is extensively used as a standard surface dressing binder in road maintenance programmes throughout Ireland. It offers the Roads Engineer a cost effective and high-tech tool to prolong the life of the road.

Irish Tar & Bitumen Suppliers has a flexible manufacturing process with the capability of formulating products to meet the specific requirements of the customer.

BENEFITS OF CATIONIC 70%

- Good adhesion to chippings, even when damp.
- Controlled break to allow proper mosaic formation.
- Extends the surface dressing season.
- Low temperature application for safer handling.
- Storage stable emulsion.

Cationic 70% complies with The NRA Binder Specifications: RC 380/2009 Table 3.

Recommended Temperature:

Storage 75 to 85°C

Prolonged Storage 60 to 70°C
